

Swissonor.ch Miniature Series

Single elements out of our AM modular system and V.S.O.P. integrated amps are now available as separate components. Optimised wiring and integrated Swissonor #12.0 quad line cables guarantee unaltered sonic performance. The mechanical construction with cast body and de-coupled aluminium top plates corresponds to the unequalled Swissonor standard. Handmade in Switzerland.

PPP Phono Step-up transformer

Hashimoto HM-3 or optional HM-X Step-up transformers, wired on order for low impedance (about 3 Ohm) or medium impedance (about 12 Ohm) MC- cartridges, combined to direct cabling, bring the worldwide highest possible sonic level to you.

	HM-3	HM-X
- Gain.....	26 dB (12Ω) or 32 dB (3Ω)	23 dB (12Ω) or 29 dB(3Ω)
- Bandwidth.....	15 Hz to 50 kHz +/- 1 dB	15 Hz to 100 kHz +/- 1dB

PP Phono Preamplifier with Passive RIAA Equalizer

Coming directly out from our V.S.O.P. integrated amplifier, the operational amplifier is fed by an external 24 V DC power supply, backed by high cap/low ESR onboard Elna capacitors, thus enhancing signal-to noise ratio and sound quality.

- Input- sensitivity for use with MM cartridges.....5 mV (Output 1V at 1kHz)
- Input- impedance for use with MM cartridges47 kΩ
- Optional for use with high output MC cartridges.....2,5 mV (Output 1V at 1kHz)
- Input- impedance for use with high output MC cartridges1 kΩ

P Passive Line Preamplifier

Simplifier is not possible. Four way input selector, ALPS Blue Velvet level attenuator and direct wiring guarantee freedom from any kind of sound quality losses.

- Gain.....0 dB
- Distortion.....not measurable
- Signal-to-noise ratio.....not measurable
